SUMMARY

Technical Writer with a strong focus on developer education, technical documentation, and long-form technical content covering Artificial Intelligence, Cloud Computing, DevOps, Cybersecurity, Platform Engineering, Site Reliability Engineering (SRE), and Software Architecture. Experienced in researching complex technologies and transforming them into clear, practical, and engaging content for developers, IT professionals, and business stakeholders.

Published across multiple respected technology publications, demonstrating the ability to communicate emerging technologies with technical accuracy, structured storytelling, and reader-focused documentation.

EDUCATION

Federal University of Technology, Minna

Bachelor of Science (B.Sc.)

Expected Graduation: 2026

EXPERIENCE

Technical Writer

2024 – Present

JON

Responsibilities

- Research emerging technologies and produce technically accurate content on AI, Cloud Computing, DevOps, Cybersecurity, Platform Engineering, and Software Architecture.
- Develop educational articles, tutorials, and documentation tailored to technical and business audiences.
- Interpret complex engineering concepts into accessible, well-structured written content.
- Validate technical information using official documentation and trusted technical references.
- Maintain editorial quality through comprehensive editing, proofreading, and content reviews.
- Apply SEO best practices while preserving technical depth and accuracy.
- Organize content to improve readability, usability, and knowledge retention.
- Support knowledge sharing through clear, structured technical communication.
- Built a diverse portfolio of technical publications spanning multiple software engineering disciplines.
- Produced developer-focused content published across internationally recognized technology platforms.
- Demonstrated consistent technical accuracy through research-backed writing and documentation.
- Enhanced accessibility of advanced technical concepts for a broad audience of developers and technology professionals.
- Maintained high editorial standards across all published work.
